

PROBLEM SOLVER

PROBLEM:

Your reciprocating saw blades are not very strong or reliable.

This Causes:

- Blades that break when out of position, disrupting your job.
- Teeth to strip off when cutting through nail-embedded wood.
- More money to be spent on more replacement blades.

SOLUTION:

Hardflex® Reciprocating Saw Blades

- Fits all standard reciprocating saws.
- High-speed steel teeth outlast ordinary blades.
- Cuts through metal, masonry, and nail-embedded wood, and more.
- Bi-metal construction allows blade to cut when out of position.
