

## PROBLEM SOLVER

### PROBLEM:

**Ordinary seam sealers must be dried thoroughly and painted to match.**

**This Causes:**

- Long wait times while sealer dries to.
- Long wait times to color match.
- Uncertainty whether the sealer will work as desired.
- Shrinking, peeling, cracking, and yellowing of the sealer.

### SOLUTION:

## High-Tech™ Clear Seam Sealer

- Clear formula does not need to be color matched.
- High-Tech™ Clear can seal wet surfaces immediately after water testing.
- Seams can be water tested immediately after sealing.
- Won't shrink, peel, crack, or yellow.

## APPLICATIONS:

- Exposed, painted seams around doors, trunks, hatches, sunroofs, and roof seams.
- Reseal seams away from the primary body damage without refinishing.
- Makes invisible repairs to exposed seams around doors, tail light capsules, and outside rear view mirrors.
- Reseals door, sunroof, cowl, and trunk seams.
