Subject: Letter of Guaranty – Drummond™ Torq Gear Lubricant DL1230C

Lawson Products, as the distributor of the above named product, guarantees this product meets regulatory guidelines in federally inspected food processing plants when used as directed below:

Category H1: Lubricants with incidental contact

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed. The final granting of authorization for the proposed use of such compound is the responsibility of the Inspector-In Charge of the official plant.

This is a letter of continuing guaranty which is valid until revoked. Lawson Products, Inc. will supply any necessary documentation to support this Letter of Guarantee should it be requested by a regulatory agency.

Please refer to the product label and Safety Data Sheet (SDS) for product usage, any dilution instructions and safety information. Should you have any questions or need additional information, please contact the Regulatory Affairs Department at the number listed below.

Sincerely,

Heather Buck,

Sr. Director, Technical Services and Product Information Management
